
Bateman–Horn race (size-normalised): CRT k_{100} vs $\Delta = -85507$ vs Euler
$p^2 + p + 21377$ ($\Delta = -85507$, ours)
$p^2 + p + 41$ (Euler, $\Delta = -163$)
$p^2 + p + k_{100}$ (CRT construction)
Random baseline ($C_f/2 = 1$)
$C_f/2 = 5.50$
$C_f/2 = 3.48$
$C_f/2 = 3.34$
Normalised density: density × ln $f(p)$
